Radiological/Nuclear Training

Introduction to Radiological/Nuclear WMD Operations for Emergency Medical Services/Healthcare (AWR-350)

Hosted By:

Border Regional Advisory Council

Course Location: 6805 Boeing Ave. ▪ El Paso, TX 79925

Hours: 1300–1700

Date:

- Tuesday–July 11, 2017

Course Length: 4 Hours

Course Description:

This half-day training course is designed for Emergency Medical Services (EMS) and Medical Healthcare personnel to provide situational awareness of response operations that will be encountered during a radiological or nuclear incident. This course will provide an introduction to radiation and to radiological/nuclear Weapons of Mass Destruction (WMD). The training provides EMS and Health Care providers with fundamental knowledge related to radiological/nuclear threats, including an overview of threat recognition and protective measures.
